

A SIMPLER WAY TO ORDER SUPPLIES

Introducing HealKit

HealKit is the easiest way to get the wound-care supplies your patients need — **no insurance paperwork, no verification delays, and shipped straight to your office.** You order what you need, we send it, and you're billed simple, transparent wholesale pricing. Making the switch takes about two minutes.

GET STARTED IN FOUR STEPS

Placing a HealKit order

Log in to your CollagenDirect portal and select **HealKit Order** from the menu. The whole process takes about two minutes.

1

Choose the patient

Search an existing patient, or add a new one — only a first and last name are required.

2

Confirm delivery

Orders ship to your office by default. Select another location if you need supplies sent to another facility.

3

Add the wound & products

Pick the product type and size, then set quantity per change, frequency, and duration. Add as many wounds as needed.

4

Sign & submit

Your name and credentials are pre-filled. Review and submit — that's it. We handle fulfillment and shipping.

Ready to switch?

You don't need to do anything special to start — just place your next supply order as a HealKit order. Want us to walk your team through it or move your standing orders over? We're happy to help.
